

Aurion

Powering
sustainable
motion

We are Aurobay. We develop and produce next-generation powertrain solutions.

Building on our 100 year heritage of continuous powertrain innovation, we are now working on how to power the sustainable mobility of the future.

Using our experience, deep knowledge and cutting edge technology platforms to open up new possibilities.

Around the world, it is not a race between different technologies – it's a joint effort. Join us on our journey to net-zero.

1907

First engine produced in Skövde factory

750K

Hybrid engines and electric motors in 2021

2,900

People globally

1.75

Billion Euros turnover in 2021

100%

Renewable energy at our Skövde plant

Looking for a leading powertrain partner?

- End-to-end powertrain partnership
- Tailored engineering services
- Contract and component manufacturing
- Analysis and verification
- Innovation projects
